HISTORY OF VICTOR

the story begins...

1969 — 79

Construction of global sales network. World-wide use of "VICTOR" trademark registered.

1968

"VICTOR Badminton", specializing in shuttlecock manufacturing, was founded by Mr. Chen Deng Li in Taipei.

1980s

First carbon fiber racket line "Columbia" launched. Title sponsor for "VICTOR Cup" in Europe, meanwhile, initiated a string of endorsement deals on world's elite players to promote the brand.

1990s

First collection of footwear announced. Production center in Nanjing, China established.

2000s

Branch offices in China and Indonesia were established. VICTOR products gained multiple approvals by the Badminton World Federation (BWF). VICTOR started sponsorship supports in 2009 to the Korean National Badminton Team as official equipment sponsor.

2010 — 14

VICTOR Stringing Institute (VSI), branch offices in Japan, Thailand and India established. Collaboration with The Walt Disney Company for the "Iron Man 3" limited series, and Hasbro for the "Transformers 4" collection, appealing to a wider generation of fans. Signed an exclusive partnership with Badminton Asia Confederation (BAC), devoting in Asian badminton development.

2017

VICTOR and Badminton Denmark agreed to a multi-year partnership, giving VICTOR the exclusive right in supporting team apparel and making VICTOR the Main Equipment and the Official "Presented-by" Sponsor at the Denmark Open. Chinese Taipei superstar Tai Tzu Ying rewrote history as she racked up six women's singles title in a row.

2025

VICTOR and Fédération Française de Badminton (FFBaD) have jointly announced the signing of a six-year long-term partnership agreement, making VICTOR the official partner of FFBaD and the French National Team from 2025 to 2030. Starting in 2027, VICTOR will also be the title sponsor of the Super 750 French Open, collaborating with FFBaD to create a high-level badminton event. In 2025, the first national events will be named „VICTOR Championnats de France“ and also other event. We are proud to start a longterm journey between VICTOR and FFBAD in 2025!

2015 — 16

Inked a 6-year partnership with Badminton Association of Malaysia (BAM) in 2015, making VICTOR the official equipment sponsor of Malaysia National Team and Malaysia Open.

2018 — 21

50th anniversary of the brand. VICTOR becomes the title sponsor of Super 1000 China Open and sponsors Super 300 Spain Masters. Tai Tzu Ying rewrote the women's singles record with 31 winning streaks and the longest period as World No.1.

2022 — 24

Starting from 2022, VICTOR has taken on the role of the official partner of Badminton World Federation (BWF) team events – the Thomas & Uber Cup and the Sudirman Cup. From 2023 onward, VICTOR has also become the official partner for the BWF World Tour Finals. In 2024, VICTOR is once again collaborating with Badminton Asia, serving as the official partner for the period from 2024 to 2027.

... and the story goes on

Dear business partners,

WE ARE DELIGHTED TO PRESENT OUR NEW VICTOR WORKBOOK FOR THE 2025/2026 SEASON.

This workbook provides you with a comprehensive overview of our extended product range, featuring innovative designs and solutions to exceed your expectations.

We would like to thank you for your trust and continued support.

VICTOR Europe continues to grow – thanks to your great support and trust in our brand, we were able to call 2024 a very successful year.

For 2025/26, we have once again expanded our range – we are now offering 4 new Teamline series - a great advantage for the clubs and for our specialist retailers.

We are also defying the general procurement and price problems in the badminton sector and are significantly expanding the range, also in order to be able to offer our customers a larger selection.

The year 2025 started with a bang for our brand - with Jonathan Christie (WRL 3rd as of January 2025) and Antony Ginting (WRL 11th as of January 2025) from Indonesia, we have gained new VICTOR players in the men's singles.

Gregoria Mariska Tunjung, bronze medallist in Paris 2024, now also swings a racket from our brand in women's singles.

Thom Giquel from France, mixed doubles player and currently no. 9 in the WRL (as of 28 January 2025), is another top athlete who will be joining the VICTOR team from 1st February 2025.

We are convinced that our partnerships and investments will not only benefit the athletes, but also inspire the badminton community worldwide. Our commitment to high quality products and excellent service remains unchanged. In addition to the expansion of our team in Europe, we emphasise sustainability and environmental awareness. Our aim is not only to offer first-class products, but also to make a positive contribution to the environment.

We look forward to continuing this exciting journey with you in 2025 and are grateful for the successful partnership.

Here's to a year full of challenges, opportunities, growth and shared successes!

With best regards,

The VICTOR Europe team

VICTOR and Fédération Française de Badminton (FFBaD) have jointly announced the signing of a six-year long-term partnership agreement, making VICTOR the official partner of FFBaD and the French National Team from 2025 to 2030. Starting in 2027, VICTOR will also be the title sponsor of the Super 750 French Open, collaborating with FFBaD to create a high-level badminton event.

As one of the European badminton powerhouses, FFBaD President Yohan Penel mentioned the new collaboration with VICTOR, saying, „FFBaD is thrilled to start this new partnership with VICTOR. We thank VICTOR for believing in French badminton. This 360° partnership will allow to open a new page in our history.“ Starting with the next team championships, the French National Team will wear new team apparel specially designed by VICTOR.

Expressing anticipation for the partnership, VICTOR Chairman Jeff Chen said, „It is a great honor to become the official partner of FFBaD. In recent years, badminton has gained popularity in Europe, and the French badminton has been continuously growing. We look forward to joining with FFBaD to promote badminton across Europe.“

The French National Team will debut exclusive national teamwear at the European Mixed Team Badminton Championships next year. From 2027 to 2030, VICTOR will also serve as the title sponsor and main equipment partner of the French Open, further strengthening the partnership for both parties.

Next to France, VICTOR has only contracts different federation across Europe – next to Denmark as one of the strongest teams in Europe, VICTOR is also official supplier in countries like Scotland, Ireland, Poland, Hungary, Latvia, Austria – and more to follow soon!

6 U = 70 - 74,9 g *without string

All badminton racket details with string and grip.

RACKET TYPES AND SERIES

SPEED IS THE FIRST STEP TO VICTORY

The SPEED type racket is light and can facilitate quick movement, allowing key opportunities to be grasped. This racket type is suitable for players who seek and rely on speed.

ATTACK IS THE BEST FORM OF DEFENCE

The POWER type racket delivers exceptional stability and power. This type of racket is for players who seek maximum power in their game.

PRECISION AND CONTROL

This stable and solid ALL-AROUND racket type gives excellent handling and is suitable for players seeking precision and control.

AURA SPEED

Excellent high resilience performance, making the best use of scientific structure and high-end materials to enable amazing speed and power.

The VICTOR squash ball enjoys a consistently high quality around the world. This is confirmed by the official WSF Certificate (World Squash Federation). Since 2014 our VICTOR squash ball double yellow has been used as a game ball in Austria and in Germany from Juli 2014 to June 2020. In 2017 the portfolio was complemented with a green squash ball for useage in regional higher altitudes and a white ball for glass courts. The other speeds (blue, red and yellow) are available in equal measure.

TECHNOLOGIES

RACKET TECHNOLOGIES AND MATERIALS

5.0mm racket frame design. With the thinnest part of the frame measuring just 5.0mm, each swing feels like wielding a sharp blade and brings lightning speed.

An aeronautical material with high-strength, and it elevates force transmission performance. This makes the racket lightweight and both strength and comfort hitting sensation are combined.

NANO AEROGEL, the world's lightest solid, is infused into the frame. By reallocating the weight balance of the frame and increasing the use of carbon fiber, both the frame's strength and hitting feel are effectively elevated.

ULTRA-THIN FRAME

The Ultra Thin Frame is up to 7% thinner than traditional rackets to improve the swinging speed while maintaining the stiffness and anti-torsion.

NEW ULTRALIGHT FRAME

The light weight frame structure designed exclusively for 6U rackets enhances the strength and reduces the weight of the frame simultaneously.

Three different frame structures are rearranged and integrated to optimize the hitting, frame characteristics and overall performance.

The smaller angle of twist in the shaft material is the key to an optimal power transmission and anti-torsion performance.

The elliptically-shaped section can decrease air resistance, provide higher anti-torque, maximize control and vastly increase the speed of a returning hit.

The adoption of the single-wall carbon nanotube (SWCNT) effectively enhances racket intensity, elasticity and fatigue resistance. The lightweight enhanced material enables both strength and smooth handling.

This diamond-shaped design cuts through the air like a sword. It significantly reduces air resistance and provides a faster swing speed.

DYNAMIC-SWORD

DYNAMIC-SWORD features an inward-cutting frame structure in the 6/12 o'clock direction, and an outward-cutting frame structure in the 3/9 o'clock direction, which is designed to imitate the aerodynamics of a sword blade cutting through the air, making each swing swift and sharp.

The box-shaped design effectively increases the stability and anti-torque, and can stand higher string tensions.

The Whipping Enhancement System incorporates a softer material in a specific part of the shaft near the throat, enhancing racket-head acceleration in a "whipping" style which helps to create steeper and quicker attacks with satisfying control.

The innovative carbon fiber layering design has improved the antitorsion performance, further making the racket flex faster with better force transmission. As a redefinition of „whipping effect“, WES 2.0 allows the players to drive the shuttle at a sharp downward angle when attacking.

Brand new shaft layering design with more directly force transmission, a steeper downward angle, and advanced whipping effect.

RACKET TECHNOLOGIES AND MATERIALS

Inspired by Helicopter rotor blade technology – the multilayered structure made of carbon fibre and composites, minimises material size and reinforces handling feel and performance.

The technology seamlessly integrates the shaft with FREE CORE, elevating the elasticity to another level and bringing out the full potential of the racket.

The integrated force of the shaft and FREECORE creates a sturdy handling and phenomenal elasticity.

AERO-HEX

Using aerodynamics technology to transform traditional hexagonal frame with better airflow-directing and air-cutting performance, further achieving incredible stability and the smoothness of swings.

Based on multilayered carbon fibre, the advanced Fibre Reinforced System (FRS) not only improves elasticity, but also offers stable controllability with high tension string.

The NANO TEC technology works by evenly distributing nano-sized particles in the vacant space between carbon fibre bundles; this increases the overall stiffness of the carbon composite fibres and reduces the distortion of the frame.

The compound frame design can be divided into three major parts: The upper section is made with a fan-shaped structure to lower wind resistance and accelerate each swing. The Compound-Sword structure in the middle section is designed to lighten the filler and enable fast rebound. Finally, the lower section is built in aerofoil structure to lower wind resistance and keep excellent anti-torsion performance in a "whipping" style which helps to create steeper and quicker attacks with satisfying control.

The introduction of METALLIC CARBON FIBER (metal + carbon fiber) into the rackets. This ensures a unique and elastic feeling, guaranteeing an unparalleled hitting experience.

METALLIC CARBON SHAFT (metal + carbon fiber) helps to boost the speed of shots and the power of smashes, allowing for sharp and accurate maneuverability.

Designed by computer simulation and aided with the adoption of injection moulding technique, this revolutionized handle style allows the shaft to move more freely, which can not only make swings smoother but also improve overall handling experience.

NANO FORTIFY TR⁺

Built on the strengths of the NANO FORTIFY TR, the NANO FORTIFY TR+ is engineered with an advanced, more durable carbon-fiber that is firm but offers pleasing resilience and feeling.

A breakthrough from traditional hexagonal frame—different types of frame structures are integrated into the upper, middle, and lower parts of the frame based on the racket setting to optimize stability and swing smoothness.

PYROFIL

PYROFIL carbon fibre is advanced high-performance and ultra light material from Japan. It offers excellent shock absorption and enhances handling in every single game.

Introducing highLy resilient and durable glass fiber into the multilayered design of the frame to provide better elasticity and comfort while hitting.

TECHNOLOGIES SHOES

NitroLite

The groundbreaking lightweight midsole is made with high performance EVA by means of an innovative nitrogen-impregnating foaming process, providing excellent durability and rebound performance.

HYPEREVA

VICTOR HYPEREVA is the latest developed midsole technology that focuses on resilience and cushioning. It's well known for incredible softness, shock-absorption, rebound performance, and how it makes the shoes both durable and lightweight. Badminton shoes built with HYPEREVA can achieve better lightweightness, elasticity, and stability than before.

VSR ANTI-SLIP

With this upgraded outsole rubber, slip-resistant performance increases on dry PU floor.

ENERGYMAX

The shock absorbing ENERGYMAX system is well known for providing comfortable support during fast movements and directional changes.

ENERGYMAX3.0

The new generation of highly elastic material, increases rebound ability and strengthens shock absorption.

ENERGYMAX3.0⁺

The high elasticity material, increased in resilience and shock absorption, can significantly enhance the instant resilience, shock absorption and cushioning effect to shocks.

ENERGYMAX V

Improves the shock absorption on the heels when striding forward. Strengthens the rebound ability of the heels during speedy defense. The shock absorbability is increased by 27%, and the bounce power is raised by 30%.

RADIATION

Coping with the asterisk steps, the centre is the rounded-shape design, surrounded by triangular shapes. The radiation pattern provides more grip on the court during lateral and vertical movements.

Breathing

A unique breathing mesh layer on the side of the shoe is used to increase ventilation creating a more comfortable environment for the feet.

Resilient EVA

Highly resilient midsole material is more durable and retains its shape better. It not only provides basic stability and shock absorption, but also increases flexibility and the reaction time while changing direction.

Light Resilient EVA

New, highly resilient and durable midsole. It improves the life-span of shoes, reduces weight, increases flexibility and lowers muscle burden during intensive exercises, which allows one to make agile movements quickly.

LS-S

The outside of the forefoot is designed using high-strength TPU. This significantly enhances the lateral stability during intense and rapid transfer of direction.

NEO DUPLEX

Joint-friendly combination of ENERGYMAX 3.0 on top and light resilient EVA sole beneath by the special biomechanical layout of these cushioning layers.

TECHNOLOGIES SHOES

V-Durable

The inner toe use the special technics to provide better strength and durability.

V-Durable⁺

Additional to the reliable V-Durable, the inner surface of the toe is equipped with protective coatings and a wear-resistant layer for enhanced endurance.

SHAPE ICONS

Designed to Reduce excess space of front shoe for Greek-type-toes.

V-Tough

The inner surface of the toe is made of super wear-resistant material which greatly improves the durability and resilience of the shoe.

Made with polyurethane granular material, E-TPU has excellent resilience and deformation recovery ability once foam molded, making it not easy to deform for long time wearing. E-TPU provides a comfortable, shock-absorbing, and elastic wearing experience, which is significantly better than traditional EVA Material.

Creates more comfort and firm responses to the Egyptian-type-toes.

The Tri-Arch support control is an arch design of the footbed based on the three arches of the foot: medial and lateral longitudinal arches and transverse arch. Tri-Arch is ergonomically designed to keep the original curvature of the three arches, which offers a more comfortable support to the sole, evenly distributes the pressure, and enables better controllability.

A high-strength light weight thermoplastics TPU arch support is placed in the arch. This prevents pronation and torsional strain while providing stability.

Designed for a better fit based on the female foot shape.

The three-dimensional carbon fiber sheet provides midsole stability and decreases torsional strain on the foot's arch.

NON MARKING SOLE

All VICTOR shoes are equipped with a NON MARKING SOLE. So you can be sure not to leave any unsightly marks on the floors.

BAG AND TEXTILE ICONS

CERTIFICATIONS

Environment protection & working conditions - partner and certifications of VICTOR

For decades, VICTOR stands for sporting expertise and innovative, high-quality products. Environmental compatibility and sustainability are in the focus as well as questions about skin compatibility, life cycle assessment and recyclability of materials and end products.

VICTOR therefore works together with the Hansecontrol company on sensitive, relevant product groups. Suppliers are put through their paces and must either comply with the BSCI standard or be supervised by SGS, TÜV Rheinland or other testing institutes that vary regionally.

Product testing for purity, contaminants and safety

Environment and labour protection

Oeko-TEX® Standard 100 is a worldwide equal test and certification system for textile.

Klimainvest – is a TÜV-certified company that supplies energy suppliers with green electricity and climate-neutral green gas and supports companies on their way to climate neutrality.

VICTOR saved in 2024
27,45 TEU of Co2 emissions.

WE SAVE PLASTIC IN EVERYDAY LIFE:

Plastic bottles are no longer used in our office. But we prefer to put them into our shirts!

WE DROP THE COVERS

In order to avoid plastic waste, we have decided to no longer include a cover with every racket as standard. Instead, we offer you the right case for every need in our assortment.

100% RECYCLED

Since 2020, we have been investing in the conversion of Teamline from conventional material to recycled material.

CONVERSION TO HYBRID/ELECTRIC FLEET

Almost all company cars have already been replaced with hybrid or electric cars.

NO FOILS IN PRINT

For print products, we use certified paper and do not refine them with films. We also try to keep the print runs low.

SAVING ENERGY

Our new European Head Office building complies with the KfW standard. This means we use as little energy as possible in the office.

PAPER FREE OFFICE

We are on a very good track.
